

POST-EXPERIMENT

Leave blank...

1. There was a clear difference in behaviour between the two “teacher robots”...

(please circle one)

| | | | | | | |
|-------------------|----------|-------------------|----------------------------|----------------|-------|----------------|
| Strongly disagree | Disagree | Somewhat disagree | Neither agree nor disagree | Somewhat agree | Agree | Strongly agree |
|-------------------|----------|-------------------|----------------------------|----------------|-------|----------------|

2. There was a clear difference in behaviour between the two “child robots”...

(please circle one)

| | | | | | | |
|-------------------|----------|-------------------|----------------------------|----------------|-------|----------------|
| Strongly disagree | Disagree | Somewhat disagree | Neither agree nor disagree | Somewhat agree | Agree | Strongly agree |
|-------------------|----------|-------------------|----------------------------|----------------|-------|----------------|

3. Which “teacher robot” was better able to perform the task?

(please circle one)

First

Second

4. Which “teacher robot” did you prefer supervising?

(please circle one)

First

Second

5. What information did you use to make your decisions in the interactions?

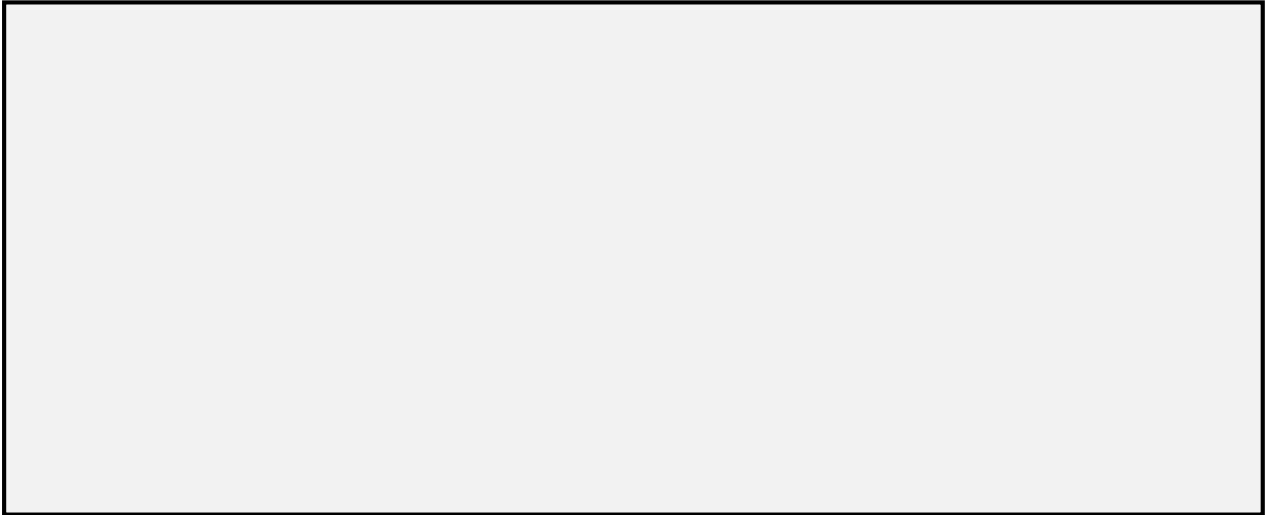

(please circle all that apply)

| | | | |
|-----------------------|----------------------|----------|----------------------|
| Child Robot behaviour | Touchscreen feedback | GUI data | Other (please state) |
|-----------------------|----------------------|----------|----------------------|

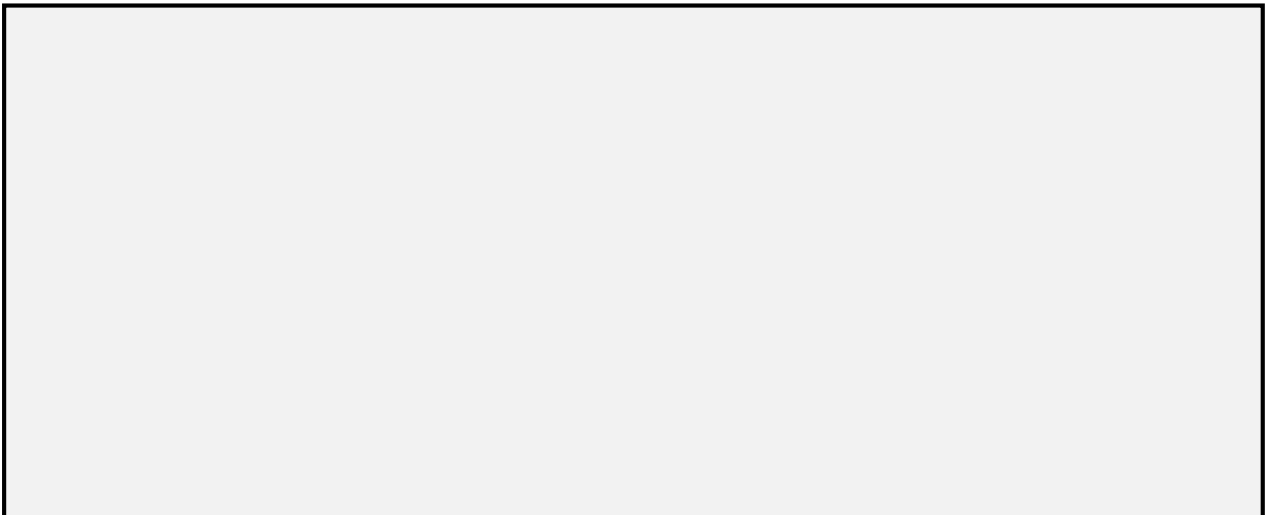

Other: _____

Please turn over...

6. Do you have any comments regarding the teacher/child robot setup?

7. Do you have any other general comments regarding the experiment and/or methodology?

Thank you for your help!
